

Lesson: 4

Paper: I

Item: flow chart

Question No. 01:

**Read the following text and make a flow chart showing some information about panda.
(One is done for you)**

Though they are one of the most beloved animal species on Earth, panda aren't safe from the devastating effects of climate change. According to a new study, projected temperature increases in China over the next century will likely seriously hinder bamboo, almost the sole source of food for endangered pandas. Ninety-nine percent of panda's diet is bamboo and adult panda needs around 34 kilograms of bamboo every day. "Only if bamboo can move to new habitats at higher elevations, will panda stand a chance of survival", the researchers said.

However, if conservation programs wait too long, human inhabitants and activities could claim all of the new habitats capable of supporting bamboo in warming world.
